## Automotive Shelving & Tire Racks

*Automotive Shelving* is specifically designed for efficiently storing automotive parts. Shelves can be reconfigured easily by simply sliding out from the front and repositioning in 1/2" increments without tools, clips or extra hardware. Each unit can be customized to create individual spaces or use handy bin boxes for small or loose parts. Use solid end panels for a smooth, finished appearance. *Z-Line Tire Rack* conveniently stores tires for easy access and display. Uses vertical height to maximize available floor space. Available in single or double entry units.

### Please Note

*Automotive Shelving*  
 Standard Colors: Medium Grey

*Tire Racks*  
 Standard Colors: Light Grey,  
 Medium Grey, Sand  
 QuickShip Colors: Medium Grey,  
 Sand

- Assembly required.

## Configured To Fit Your Needs!

Automotive Shelving system can be easily modified as your needs change and grow, since old components can be reconfigured and new ones added.

What's more, it's a simple matter to rearrange units since each is freestanding, with its own uprights.

And to give the units a clean, sleek look, we've designed solid piece decorative end panels that cover the uprights.

Available in two cabinet heights: 42" and 84".

### Shelf Dividers

Choose from three sizes of shelf dividers: 3", 4 $\frac{1}{2}$ " and 6" high. Each divider is fully adjustable horizontally and comes standard with a label holder. All edges are rounded, so they won't snag or tear merchandise.

### Decorative End Panels

Decorative solid end panels fit flush against upright, adding strength to the unit and creating a smooth, finished appearance.

### Label Holders

Full-width shelf edge label holders take only an instant to snap on. Place your labels anywhere on the holder.

### Easy Adjustability

Shelves slide in easily from the front and feature a safety catch keeping them firmly in place. Easily adjusted every 1 $\frac{1}{2}$ ", with no need of bolts or clips.
