1 Assembles Easily

Bulk storage units go together fast and easy — beams simply slide into place. Assembly takes less than half the time of most other shelving products.

2 Extra Strength

Our standard Rolled Formed Steel Beams provide added strength at front and rear of shelf edges.

3 Shelf Support Options

Optional Box Beam is used to hold wire decking and is reinforced with a box beam brace.

4 Economical

Adjacent units share a common upright for greater economy.

5 Preassembled Uprights

Welded uprights make installation fast and convenient.

Bulk Storage Decking Options

Corrugated Steel

Featuring a rigid surface, with minimal deflection under load, corrugated decking provides a sturdy option for general purpose storage. Its smooth finish allows easy sliding of stored items on and off the shelving. Flame retardant, attractive corrugated shelves are light and easy to install.

Wood Decking

For heavy-duty applications, economical wood decking is a great choice.

Flat Wire Decking

Wire decking provides better air flow and visibility of your stored items and meets factory fire codes. Available in flat or waterfall.

Waterfall Wire Decking

Bulk Storage Racks: Components

Combine the deck levels and decking below with Bulk Storage Upright Frames to create an economical method for storing bulky items. Deck levels include beams and supports to create one level of shelving which will accommodate any of our three decking options. Choices of decking include corrugated steel, wire mesh* or particleboard. Particleboard decking can be purchased from Tennsco or obtained locally.
